

Flexibility in the smallest size.

The Seafari Mini series of watermakers is now available in modular form. With productions ranging from 170 to 750 gallons of fresh water per day, the Seafari Mini Modular is the perfect solution for smaller boats with little space to spare. It's new modular design provides multiple installation options that will not compromise precious storage or engine room space. With the most stable controller in the market, the Seafari Mini Modular is easy to use and is the smallest, most flexible, and most reliable watermaker in the industry. Perfect for those who prefer to navigate in smaller boats.

Key Features:

- Modular configuration allows flexible installation options
- Fits into any small boat, in the tightest of spaces
- Large water production give you more freedom on water, without space or weight compromises
- Low AC Power consumption
- Easy access to main components
- Modern push button controller that provides easy to use maintenance features.
