Power Without **Li³**imits

The Outlaw™ 1072S is a portable, renewable power source that puts lithium power right at the tips of your fingers. At only 32 lbs, the Outlaw is versatile enough to be used for a variety of applications. Take it with you on camping trips, use it as an alternative power source at home or have it ready in case of an emergency power outage. It can be used to charge a number of appliances and electronics, so you have safe, long-lasting power on-hand without the noise and fumes of a gas generator.

Solar panel not included

PACKABLE LITHIUM POWER

From off-road expeditions to outdoor adventures, the plug-and-play Outlaw 1072s enhances each experience by providing premium power.

POWER TOOLS

ELECTRIC BLANKET

**Recharging and runtimes will vary depending on usage, power consumption rating of actual used devices and the number of devices connected to the Outlaw at one time.*

THE OUTLAW ADVANTAGE

LiFePO4 TECHNOLOGY

Developed with safe and long lasting lithium iron phosphate (LiFePO4) chemistry.

ENVIRONMENTALLY FRIENDLY

Zero noise or carbon emissions during use. Recharge from the sun by connecting a compatible solar panel.

SAFE AND WORRY-FREE

Pure sine wave inverter to power sensitive devices and internal battery management system for layered protection.

EASY TO TRANSPORT

Ergonomically designed carrying handle and lightweight for portability.

UP TO 7X LONGER LIFE*

Long lasting, daily use with over 3,500 life cycles.

DID YOU KNOW?

Other lithium chemistries, such as NMC and LCO, are only able to offer 500-1000 life cycles. LiFePO4 provides 3,500+ giving you a better return on your investment.*

**When compared to other lithium chemistries on the market.*

3 WAYS TO CHARGE

⚡ AT HOME, IN THE SUN, OR ON THE RUN

- 12V Car Port
- Quick Port (30A in/out)
- AC Outputs
Region Specific
- AC Power Button
- Input DC in Charger Port

Features

- 1000 Watts | 921 Watt Hours
- 72 Amp Hours
- Pure Sine Wave Inverter
- Solar panel compatible 15-25V
160W (Max)
- Elevated Vents for Internal Cooling
- Internal Battery Management System

- LCD Screen Displays Voltage, Watts In/Out and Remaining Runtime
- 3 Type-A Outputs
- 2 Type-C Outputs
- DC Power Button
- 2 DC Output Ports

WHAT OUR CUSTOMERS ARE SAYING

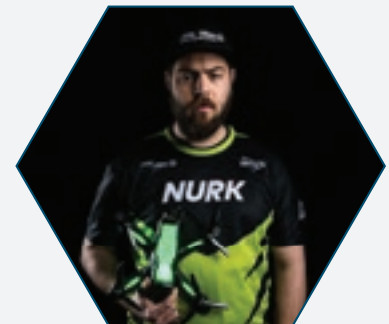

"What I like to do if I'm out tailgating or going camping, I like to have my grill that I can just quick plug into the 110-volt outlet on there, hit the power button and it fires up your grill and you're ready to be cooking in a matter of minutes. It's super easy so you don't have to worry about carrying extension cords with you or anything like that and when you're tailgating you also got some buddies that forget their phone charger and their phone's dying throughout the day, there are three USB ports, so you can power all sorts of things on the Outlaw throughout the whole day."

- GRAE BUCK, MAJOR LEAGUE FISHING PRO ANGLER

"(With this Outlaw), we've got three GoPro's charging, and then I've got my big D6 charger coming off the back, we're just pulling this thing all day. We've charged batteries 4x today and this thing doesn't even bat an eye. I love this thing so much!"

- PAUL NURKKALA, DRONE RACER

"Over the last two months, I've driven nearly 7,000 miles visiting four national parks and 10 states. I couldn't have done it without my wonder device, the portable RELiON Outlaw 1072S. To prepare for my road trip, I converted my car into a mini-camper. To access electricity, I use the Outlaw. Not only does the Outlaw provide ample power for several days, but it comes with myriad ports and adapters to plug in your laptop, phone, mini-cooler, fan, and just about any small to medium electronic device. To recharge, it has AC and solar charging—you can plug it into a wall or solar panel. I attached my Outlaw to a 160-watt solar panel on my roof rack and it charges as I drive. Nothing beats free clean energy from the sun!"

- PAUL C.
