Simple, direct feed to your current watermaker

The UltroClear DF works with your RO system to convert sea water to double purified water. It's reliable piping connection allows direct feed that activates an automatic operation, and produces spot-free water when water is directly fed into the system.

Ultra-pure water is 99% free of water solids. Perfect for rinsing hulls, windows, and extends the life of your boating equipment. It gently lifts debris and dries spot-free.
